HONEYWELL ACQUIRES MOVILIZER, LEADER IN SIMPLIFYING OPERATIONS FOR REMOTE CONNECTED WORKERS

- *The Movilizer Cloud Platform Seamlessly Integrates with Honeywell's Portfolio of Devices, Voice Solutions, Rugged Mobile Computers, and Bar Code Scanners*
- *Software Platform Works on All Mobile Devices, Giving Users Greater Freedom and Flexibility*
- *Movilizer Has More Than 200 Multinational Customers in 30 Countries*
- *Named a 2015 "Cool Vendor" by Gartner¹*

Fort Mill, S.C., March 1, 2016 - Honeywell (**NYSE: HON**) has completed its acquisition of privately held Movilizer, which created one of the world's first cloud platforms for field service applications. Movilizer is used by remote workers performing service or maintenance, sales and distribution, and warehousing activities away from the office. Terms of the deal were not disclosed.

Movilizer's cloud software enables a distributed workforce to create, deploy and manage workflow solutions – whether at the point of sale, in the field, in a warehouse or distribution center. Customers can seamlessly collect, transmit and analyze data generated by their workers on their existing information technology (IT) systems, enabling them to harness the power of their workforce from anywhere to best serve the needs of their end customers.

"Acquiring Movilizer's cloud software platform advances our vision of the connected worker, driving growth, value through data, and new business models for our customers," said Alex Ismail, president and CEO, Honeywell Automation and Control Solutions. "Movilizer will drive greater productivity and flexibility for our customers and also helps us rapidly expand our software capabilities as a provider for the Industrial Internet of Things (IIoT) to enable greater safety, security and productivity for buildings, industrials and workers."

"Businesses that operate with a distributed workforce want software solutions that can be rapidly developed, are massively scalable and that make their mobile teams more connected and more valuable to the enterprise," said John Waldron, president, Honeywell Sensing and Productivity Solutions. "Movilizer's Gartner-acclaimed, industry-leading cloud platform technology is the perfect complement to Honeywell's Workflow Solutions portfolio of mobile productivity

technology, including data collection, voice solutions, rugged mobile computers, bar code scanners and workflow printing solutions.”

Movilizer’s multi-tenant, cloud and mobile applications are currently used by more than 200 multi-national companies in 30 countries, executing more than 1.5 million mobile business application transactions daily in the utility, manufacturing and engineering, transportation and logistics, and consumer packaged goods industries. The platform allows customers running SAP for example, to more quickly build native mobile applications from scratch inside SAP or to rapidly deploy out-of-the-box mobile applications for service, maintenance, sales, distribution, warehouse or track-and-trace environments in just days.

Movilizer was named a 2015 “Cool Vendor in Mobile App Development” by Gartner, a leading information technology research and advisory company. In addition to Movilizer’s solutions for track and trace, direct store delivery and field maintenance environments, its platform has enabled more than 100 partners and customers to create more than 1,000 unique applications for fleet management, field service, direct store delivery, asset rental management, mobile order entry, time and attendance reporting, among others.

Movilizer is headquartered in Mannheim, Germany, and has a team of more than 100 people. Movilizer is now part of Honeywell Sensing and Productivity Solutions, based in Fort Mill, South Carolina, a business unit within Honeywell Automation and Control Solutions.
