Forward Looking Statements

This presentation contains certain statements that may be deemed “forward-looking statements” within the meaning of Section 21E of the Securities Exchange Act of 1934. All statements, other than statements of historical fact, that address activities, events or developments that we or our management intends, expects, projects, believes or anticipates will or may occur in the future are forward-looking statements. Such statements are based upon certain assumptions and assessments made by our management in light of their experience and their perception of historical trends, current economic and industry conditions, expected future developments and other factors they believe to be appropriate. The forward-looking statements included in this release are also subject to a number of material risks and uncertainties, including but not limited to economic, competitive, governmental, and technological factors affecting our operations, markets, products, services and prices, as well as the ability to effect the separations and meet the related conditions noted above. Such forward-looking statements are not guarantees of future performance, and actual results, developments and business decisions may differ from those envisaged by such forward-looking statements, including with respect to any changes in or abandonment of the proposed separations. We identify the principal risks and uncertainties that affect our performance in our Form 10-K and other filings with the Securities and Exchange Commission. In addition, third-quarter results contained herein are preliminary and may differ from our actual results that will be reported in our third-quarter earnings release and Form 10-Q filed on October 20, 2017.

This presentation does not constitute an offer to sell, or a solicitation of an offer to buy, any security and shall not constitute an offer, solicitation or sale in any jurisdiction in which such offer, solicitation or sale would be unlawful.

Non-GAAP Financial Measures

This presentation contains financial measures presented on a non-GAAP basis. Honeywell’s non-GAAP financial measures used in this presentation are as follows: segment profit, on an overall Honeywell basis, a measure by which we assess operating performance, which we define as operating income adjusted for certain items as presented in the Appendix; segment margin, on an overall Honeywell basis, which we define as segment profit divided by sales; organic sales growth, which we define as sales growth less the impacts from foreign currency translation and acquisitions and divestitures for the first 12 months following transaction date; free cash flow, which we define as cash flow from operations less capital expenditures; free cash flow conversion, which we define as free cash flow divided by net income attributable to Honeywell; and earnings per share, which we adjust to exclude pension mark-to-market expenses and to normalize quarterly earnings per share measures for the expected effective tax rate as previously guided for the most recently completed fiscal quarter, as well as for other components, such as divestitures and debt refinancings, as noted in the reconciliations presented in the Appendix. Other than references to reported earnings per share, all references to earnings per share in this presentation are so adjusted. The respective tax rates applied when adjusting earnings per share for these items are identified in reconciliations presented in the Appendix. Management believes that, when considered together with reported amounts, these measures are useful to investors and management in understanding our ongoing operations and in the analysis of ongoing operating trends. These metrics should be considered in addition to, and not as replacements for, the most comparable GAAP measure. Refer to the Appendix attached to this presentation for reconciliations of non-GAAP financial measures to the most directly comparable GAAP measures.

</table>

(1) Earnings per share attributable to 2016 divestitures utilizes weighted average shares of 774.4 million and a blended tax rate of 32.9% for the three months ended September 30, 2016.

(2) The Company has and continues to have an ongoing level of restructuring activities, for which there is a planned amount of restructuring-related charges. Additional restructuring represents only amounts that are incremental to those planned restructuring amounts. For the three months ended September 30, 2017, the Company funded approximately $100 million of restructuring, approximately $60 million of which was incremental to the planned amount. This additional restructuring was enabled by a lower than expected effective tax rate for the period. We believe that the exclusion of this additional restructuring provides a more comparable measure of year-on-year results. Earnings per share attributable to additional restructuring uses a tax rate of 26% for three months ended September 30, 2017.

We believe earnings per share adjusted to normalize for the expected effective tax rate of 26% for the most recently completed fiscal quarter (as presented in prior guidance for such quarter) and to exclude the 2016 divestitures is a measure that is useful to investors and management in understanding our ongoing operations and in analysis of ongoing operating trends.
