Part II Organizational Action Attach additional statements if needed. See back of form for additional questions.

14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ▶ On October 1, 2016, Honeywell International Inc. ("HON") distributed 100% of the common stock of AdvanSix Inc. ("ASIX") to the HON common shareholders of record as of September 16, 2016 (the "Distribution"). In the Distribution, each such shareholder received 1 share of ASIX common stock for every 25 shares of HON common stock held as of the record date.

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ Subject to the discussion of the relative fair market value of HON and ASIX common stock in box 16 below, as a consequence of the Distribution, each HON U.S. shareholder should allocate 99.4706% of its basis in its HON stock held immediately before the Distribution to its HON common stock and 0.5294% to the ASIX common stock received in the Distribution.

As an example, take a shareholder who held 100 HON common shares, which he acquired before the Distribution for \$100/share, for an aggregate basis of \$10,000. In the Distribution, he would have received 4 shares of ASIX common stock. He would allocate 99.4706% of his basis--\$9947.06 or about \$99.47/share--to his HON common stock, and 0.5294% of his basis--\$52.94, or about \$13.24/share--to the ASIX common stock he received in the Distribution.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ The aggregate basis of the HON common stock and ASIX common stock held by each U.S. holder immediately after the Distribution will be the same as the aggregate tax basis of the HON common stock held immediately before the Distribution, allocated between the HON common stock and the ASIX common stock in proportion to their relative fair market values on the date of the Distribution.

There are a number of ways to determine the fair market value of HON and ASIX common stock. The allocation described in box 15 is based on the value-weighted average price (VWAP) of HON and ASIX common stock (\$115.9483 and \$15.4276, respectively) on October 3, 2016, the next trading date following the Distribution. Other valuation methodologies may exist, however, and we urge you to consult your tax advisor regarding these basis allocation calculations.

Shareholders that have acquired different blocks of HON common stock at different times or at different prices should consult their tax advisor regarding the allocation aggregate basis among HON and ASIX common stock.
